

# Equipment set TP 1311

## Sensors for object detection

### The purpose of automation technology

The subject of sensors for object detection is covered extensively in the TP 1311 equipment set. The topics include configuration, function, areas of application, and the selection of sensors based on the requirements of an application.

The equipment set contains sensors with analog and binary output signals, although the focus is on binary output signals. These sensors are called proximity switches.

The following types are contained in the equipment set:

- Magnetic proximity sensors
- Inductive proximity sensors
- Optical proximity sensors
- Capacitive proximity sensors
- Inductive sensors (analog)

### The special feature

Hands-on experience plays a central role in teaching the fundamentals of sensors for object detection. Examples are used to demonstrate the general operational principles of different sensors. Special attention is paid to the selection of the right sensor, its connection, the correct setting, and functional checking.

With the TP 1311 students can acquire a thorough, basic knowledge about sensors for object detection.

### Course topics

- Configuration, function, and coefficients of the sensors used
- Basic principles of connection and circuit technology
- Influence of object shape, material, surface, and color on the switching characteristics of sensors
- Terms which describe coefficients and functional behavior
- Configuration of logic circuits
- Selecting appropriate sensors by taking into account certain parameters

**Complete equipment set TP 1311 566918**

The most important components at a glance:

1	1x Proximity sensor, magneto-resistive	566199
2	1x Proximity sensor, inductive, M12	548643
3	1x Proximity sensor, inductive, M18	548645
4	1x Analog sensor, inductive, M12	548644
5	1x One-way light barrier, receiver	548647
6	1x One-way light barrier, transmitter	548648
7	1x Fiber-optic unit	548655
8	1x Fiber-optic cable	548659
9	1x Retro-reflective sensor	548649
10	1x Reflector (triple mirror), 20 mm	548650
11	1x Diffuse sensor with background suppression	548656
12	1x Proximity sensor, capacitive, M12	548651
13	1x Indicator unit and distributor, electrical	162244
14	1x Slide unit	572740
15	1x Set of test objects	549830

**Workbook**

Fifteen projects based on industrial examples, suitable for equipment set TP 1311, each including problem descriptions, parameters, and project tasks, deal in detail with the specific subject of sensors for object detection. The main topics are configuration, function, and the influence of material properties on behavior, possible applications, and how to select a sensor based on the application condi-

tions. The content topics are covered by exercises using magnetic, inductive, optical, and capacitive proximity sensors.

The workbook includes:

- Sample solutions
- Training notes
- Multimedia CD-ROM with graphics, photos of industrial applications
- Exercise sheets for trainees
