

# Visible Body Courseware

Custom design your own visual and interactive  
virtual Anatomy and Physiology courses

## What is Visible Body Courseware?

Courseware is a web-based platform which include four applications that support teaching Anatomy and Physiology. When partnered with Visible Body Human Anatomy Atlas on zSpace, students are able to extend their virtual reality lab experiences on other devices. Instructors use Courseware to deliver course assignments, assign quizzes, manage grades, transform lecture presentations to include 3D models and animations, and expand and enhance anatomy lab dissections.

## What's included:
